Frequently Asked Questions

Q: What is the difference between “Jobs Supported by Exports: Product” and “Jobs Supported by Exports: Industry”?

A: “Jobs Supported by Exports: Product” shows estimates for the jobs supported by the export of a product across all industries that produce or supply inputs used in the production of the exported product. “Jobs Supported by Exports: Industry” shows the jobs supported within an industry across all exports that are produced by or use the production of that industry as an input.

Q: What is the difference between goods exports and manufactured product exports?

A: Goods exports include manufactured products as well as other products like agricultural goods and natural resource commodities.

Q: Where can I find additional information?

A: The full report is available on our website at: <http://www.trade.gov/mas/ian/employment>.
