INFORMATION TECHNOLOGY SECURITY OVERSIGHT POLICY

1. PURPOSE

The International Trade Administration (ITA) Information Technology (IT) Security Policy document specifies and explains the minimum standards for implementing IT security policies and procedures within ITA and thereby establishes the foundation for comprehensive rules and practices that regulate access to the ITA's IT systems, and the information processed, stored, and transmitted by those systems.

2. BACKGROUND

Cybersecurity is one of the most daunting challenges facing agencies in the United States Federal Government. Though the International Trade Administration (ITA) has staff distributed across the entire globe, the organization is committed to protecting the information that is critical to every employee.

The Chief Information Security officer (CISO) is responsible for developing and implementing an information security program which includes creating guidance documents designed to protect enterprise communications, systems, and assets from both internal and external threats. In conjunction with the Chief Information Officer (CIO), the TSI CISO works to procure cybersecurity products and services and to manage disaster recovery and business continuity plans. The CISO anticipates new threats and actively works to prevent them from occurring by establishing directives, guidance, and procedures. Finally, it is imperative that the CISO monitors compliance with all security directives to ensure that it is widely implemented and allows the ITA be pro-active when it comes to ensuring the integrity of our computing infrastructure.

3. SCOPE AND APPLICABILITY

This policy applies to all ITA organizational units and their employees, federal and contractors, guests, collaborators, and other personnel requiring access to the hardware and software components that constitute ITA's IT systems.

4. POLICY

The CISO will serve as the CIO's liaison to federal agencies for all matters relating to ITA's IT security.

    A. The CISO will enforce compliance of the ITA Rules of Behavior and will develop additional ITA procedures and guidance documents for implementing information security technologies.

B. All ITA employees and contractor employees are entrusted with ensuring the cyber-security posture of ITA computing devices. All computing devices (desktop computer, laptop or phone) shall be connected to the ITA network within 24 hours of notification by TSI of a 0-day vulnerability and shall remain connected for a period at least 24 hours.

10.   Appendix A: USING ENCRYPTED MESSAGING SERVICES GUIDANCE

PURPOSE

To establish guidelines for acceptable use of encrypted messaging services. Proper use of encrypted messaging services will ensure the physical safety of ITA staff. TSI wants to ensure that ITA staff can protect themselves and allows the use of certain applications for appropriate purposes.

BACKGROUND

The Chief Information Security Officer (CISO) is responsible for developing and implementing an information security program which includes creating guidance documents designed to protect enterprise communications, systems, and assets from both internal and external threats. In conjunction with the Chief Information Officer (CIO), the TSI CISO works to procure cybersecurity products and services and to manage disaster recovery and business continuity plans. The CISO anticipates new threats and actively works to prevent them from occurring by establishing directives, guidance, and procedures.

SCOPE AND APPLICABILITY

This guidance applies to all ITA organizational units and their employees, federal and contractors, guests, collaborators, and other personnel requiring access to the hardware and software components that constitute ITA's IT systems.

GUIDANCE

TSI only authorizes the use of encrypted messaging services from American companies that use sufficiently strong encryption.

Examples of acceptable use of encrypted messaging services include:

     a) Coordinating arrivals and departures with ITA staff, partners, and clients while traveling abroad.
     b) Unofficial communications for the purposes of managing event or travel logistics and other coordination activities.

Examples of unacceptable use of encrypted messaging services include, but is not limited to:

     a) Sending, distributing, or retaining fraudulent, harassing, obscene or sexually explicit material messages and/or materials.
     b) Engaging in private commercial business activities or profit-making ventures.
     c)Creating, using, accessing, downloading, storing, or distributing any copyrighted materials that are not properly licensed by the Government for official use on ITA IT systems. This includes but is not limited to audio, video, still images, and software files.
     d) Incurring additional costs to the Government.
     e) Sharing passwords.

f) Gambling.

g) Sending, distributing, or retaining substantive documents.

h) Conducting Official Business or generating, sending, distributing, or retaining Official Records.

i) Engaging in conduct unbecoming a representative of the Government, or any other behavior that would embarrass the Government.

Approved encrypted messaging products:

a) Signal

Prohibited encrypted messaging products:

a) WeChat

11.   Appendix B: GOVERNMENT FURNISHED EQUIPMENT (GFE) SECURITY UPDATE GUIDANCE

PURPOSE

To establish the guidance for International Trade Administration (ITA) end users to connect all ITA Government Furnished Equipment (GFE) to the network to receive the latest security and network updates.

BACKGROUND

Security updates are a vital component of running antivirus and firewall software for computers. To minimize the number of computer security incidents related to malware and disruption, ITA is being proactive to ensure the integrity of our computing infrastructure.

SCOPE AND APPLICABILITY

This guidance applies to all ITA organizational units and their employees, federal and contractors, guests, collaborators, and other personnel requiring access to the hardware and software components that constitute ITA's IT systems.

GUIDANCE

A. All computing devices (desktop computers, laptops, and mobile devices) shall be connected to the ITA network (either onsite or via Virtual Private Network (VPN)) every week and shall remain connected for a period not less than 60 minutes to ensure that the latest cyber security patches are downloaded and properly installed. The end user is responsible for ensuring that the device is connected and allowing enough time for the patching activities to occur.

B. All ITA software updates shall be installed by Enterprise Operations.

12.   Appendix C: ACCOUNT ACCESS GUIDANCE

PURPOSE

To provide International Trade Administration (ITA) Account Access guidance.

BACKGROUND

Title I of the Federal Electronic Communications Privacy Act of 1986 (18 United States Code (USC) Sections 2510, 2701, and 3121) states that any workplace correspondence on a government device is the property of the employer. At ITA, any government-furnished equipment supplied to an employee is the property of ITA and shall be used for authorized purposes or according to guidance in the limited personal use policy. Accessing an employees' account may be needed to secure evidence in the case of a lawsuit or the government may want to monitor the e-mails of an employee suspected of sending proprietary or inappropriate information to outside agencies. The Account Access Policy protects ITA from legal liability, reputation damage, and potential security breaches and can be used as a mechanism for ensuring that the workplace is free of harassment. This guidance provides the instances that warrants accessing an employees' account and the steps for obtaining authorization.

SCOPE AND APPLICABILITY

This guidance applies to all ITA organizational units and their employees, federal and contractors, guests, collaborators, and other personnel requiring access to the hardware and software components that constitute ITA's IT systems.

GUIDANCE

ITA has the right to monitor the employees' use of their accounts and must ensure that all personnel who use these accounts are aware of this fact. Upon logging on to any ITA computer system, all employees are informed that usage may be monitored, recorded, read, copied, and disclosed by and/or to authorized personnel for official purposes, including criminal investigations and that there is no expectation of privacy. Access or use of the ITA computer system by any person, whether authorized or not, constitutes consent to these items. There is a myriad of specific instances for Directors, Supervisors, System Administrators, and/or individuals acting on their behalf to access the accounts of ITA employees. These occurrences are, but not limited to, a criminal investigation, an unexpected passing of the employee, and/or the need by an authorized individual to access time-sensitive material on the employees account.

EXAMPLES OF INSTANCES REQUIRING ACCESS TO EMPLOYEE ACCOUNTS (NOT ALL-INCLUSIVE):

   A. Criminal Investigation: The actions of Federal employees might result in a reprimand or firing. Allegations of misconduct for federal employees can involve both internal civil or administrative investigations along with criminal proceedings. While criminal investigations related to federal employee misconduct may begin at the same time as an internal administrative investigation, they must be handled like any other criminal investigation. Once ITA is notified that an

employee is under any investigation, the appropriate adjudicating authority may compel access to all government accounts used by the individual suspected of the offense

  B. <u>Passing of an Employee:</u> If a current or former ITA employee has passed, ITA can access all accounts used for official business-related purposes.

  C. <u>Time-Sensitive Requirement:</u> If a superior has requested a deliverable that is needed immediately from an employee who is incapacitated and cannot immediately access their ITA account, a Superior may require access to their account to retrieve the specific item. Superiors are defined as Political Appointees, Senior Executive Services Members, and other Key Staff.

  D. <u>FOIA Request:</u> Under the FOIA, agencies must disclose any information that is requested except to the extent that such records (or portions of them) are protectable from public disclosure by one of nine exemptions or by one of three special law enforcement record exclusions.

All ITA Employees have acknowledged this document based on their consent to monitoring on the start-up page and the annually signed Accepted Rules of Behavior memorandum. Additionally, the Federal Records Act (Code of Federal Regulations (CFR) 36 and 44 USC), generally requires agencies to keep and organize electronic messages relevant to agency business as official agency documents, subject to disclosure under the Freedom of Information Act (FOIA) and for other purposes. All ITA staff, including key staff, must adhere to all applicable records management policies, including those defined by their Business Unit (BU), the ITA, and the National Archives and Records Administration.

13. Appendix D: PROHIBITED SOFTWARE GUIDANCE

PURPOSE

To establish guidelines for prohibited software due to risks inherent in the supply chain, design, implementation, and/or corporate control of certain software it presents a significant risk to the cyber posture of the ITA TSI wants to ensure that ITA staff can protect themselves and allows the use of certain applications for appropriate purposes.

BACKGROUND

The Chief Information Security officer (CISO) is responsible for developing and implementing an information security program which includes creating guidance documents designed to protect enterprise communications, systems, and assets from both internal and external threats. In conjunction with the Chief Information Officer (CIO), the TSI CISO works to procure cybersecurity products and services and to manage disaster recovery and business continuity plans. The CISO anticipates new threats and actively works to prevent them from occurring by establishing directives, guidance, and procedures.

SCOPE AND APPLICABILITY

This guidance applies to all ITA organizational units and their employees, federal and contractors, guests, collaborators, and other personnel requiring access to the hardware and software components that constitute ITA's IT systems.

GUIDANCE

TSI maintains a list of prohibited software. The software on this list is not allowed to be executed or installed on any Government Furnished Equipment (GFE) information processing devices, including servers, desktops, laptops, tablets, cellular phones, or any other information processing asset. In certain cases, an exemption may be documented and approved by the CIO, however no exceptions to this policy are to be allowed without the express written permission of the CIO.

This guidance is subordinate to and does not supersede the directions for protecting Personally Identifiable Information, Business Identifiable Information, and other sensitive information as spelled out in ITA, DOC, and Federal policies.

All software on this list is prohibited from being used or installed on Government Furnished Equipment (GFE) at ITA:

    A. Waze
    B. WeChat
