

Global Steel Trade Monitor

Steel Imports Report: Turkey

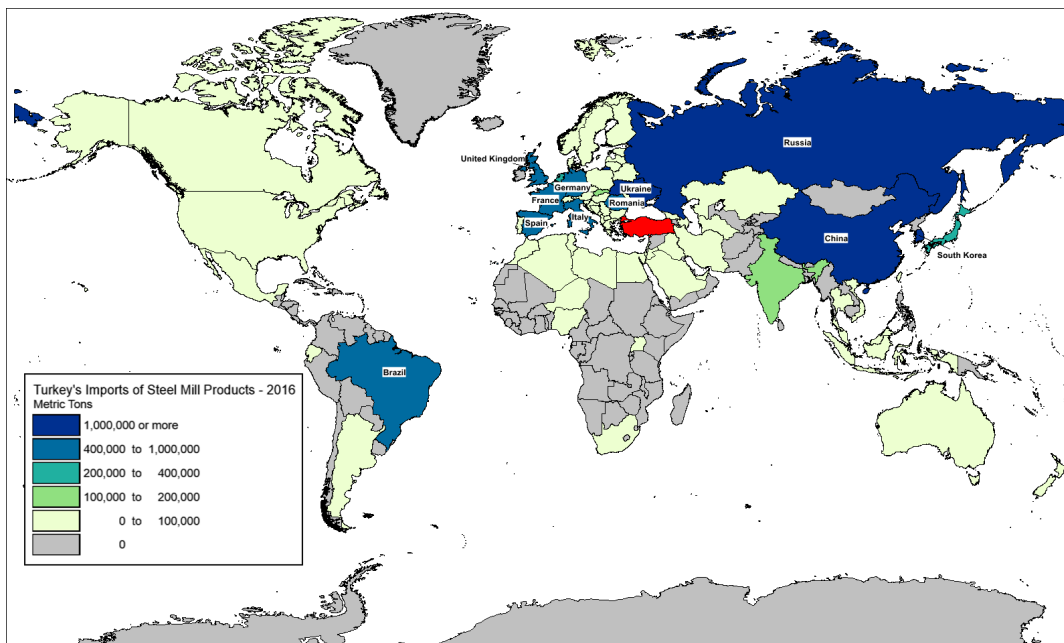

June 2017

Background

Turkey is the world's sixth largest steel importer. In year to date 2017 (through March), further referred to as YTD 2017, Turkey imported 3.2 million metric tons of steel, a 26 percent decrease from 4.3 million metric tons in YTD 2016. Turkey's imports represented about 4 percent of all steel imported globally in 2016. The volume of Turkey's 2016 steel imports was roughly half that of the world's largest importer, the United States. In value terms, steel represented just 4 percent of the total amount of goods Turkey imported in 2016.

Turkey imports steel from more than 80 countries and territories. The 11 countries labeled in the map below represent the top import sources for Turkey's imports of steel, with each sending more than 400 thousand metric tons and together accounting for 85 percent of Turkey's steel imports in 2016.

Turkey's Imports of Steel Mill Products - 2016

Data Source: Global Trade Atlas; Copyright © IHS Global Inc. 2017. All rights reserved.

Quick Facts:

- World's 6th largest steel importer: 3.2 million metric tons (YTD 2017)
- 26% steel import decline since YTD 2016
- Import penetration down to 43.7% in YTD 2017 from 53.2% in YTD 2016
- YTD import volume down 26% while import value down 3%
- Top three import sources: Russia, Ukraine, China
- Largest producers: Erdemir Group, İçdaş, Habaş
- 6 trade remedies in effect against imports of steel mill products

Steel Imports Report: Turkey

Steel Trade Balance

From 2005 through 2014, Turkey maintained a nearly continuous trade surplus in steel. Rising imports caused the surplus to briefly become a trade deficit in 2015 and 2016. In mid-2016, imports declined while exports grew, which returned Turkey's trade balance back to a surplus. In YTD 2017, Turkey posted a trade surplus of 1.5 million metric tons — a 483 percent increase from -401 thousand metric tons in YTD 2016.

Source: IHS Global Trade Atlas

Import Volume, Value, and Product

In 2016, Turkey's steel imports amounted to 15.4 million metric tons, a decline of 2 percent from 15.6 million metric tons in 2015. In YTD 2017, the volume of Turkey's steel imports decreased by 26 percent to 3.2 million metric tons compared to 4.3 million metric tons in YTD 2016. The value of Turkey's YTD 2017 steel imports also declined, down 3 percent to \$1.96 billion from \$2.02 billion in YTD 2016.

In YTD 2017, flat products accounted for the largest share of Turkey's steel imports at 61 percent, or 1.9 million metric tons. Semi-finished steel accounted for 20 percent, or 631 thousand metric tons, of Turkey's imports of steel in YTD 2017, followed by long products at 11 percent (349 thousand metric tons), stainless products at 5 percent (149 thousand metric tons), and pipe and tube products at 4 percent (113 thousand metric tons).

Steel Imports Report: Turkey

Imports by Top Source

The top 10 source countries for Turkey's steel imports represented 84 percent of the total steel import volume in YTD 2017 at 2.7 million metric tons (mmt). Russia accounted for the largest share of Turkey's imports by source country at 32 percent (1 mmt), followed by Ukraine at 12 percent (0.4 mmt), China at 8 percent (0.3 mmt), and South Korea at 6 percent (0.2 mmt).

Turkey's Steel Imports - Top 10 Sources
YTD 2017 - Millions of Metric Tons

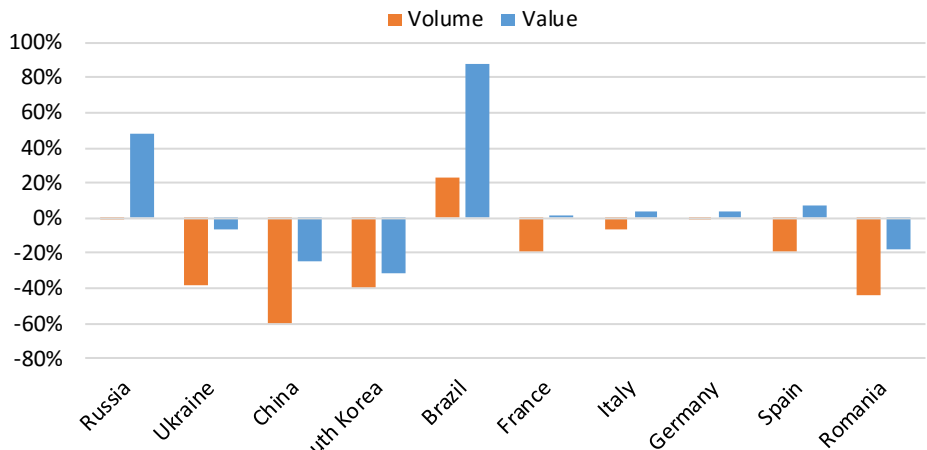

Source: IHS Global Trade Atlas
YTD through March

The United States ranked 38th as a source for Turkey's steel imports in YTD 2017. Turkey imported 2 thousand metric tons from the United States in the first quarter — a 10 percent increase from 1.8 thousand metric tons in YTD 2016.

Trends in Imports from Top Sources

While the volume of Turkey's steel imports decreased from all but one of the top ten steel import sources between YTD 2016 and YTD 2017, the overall value of Turkey's steel imports increased from six of the top ten source countries.

Percent Change in Imports from Top 10 Sources (YTD 2016 to YTD 2017)

Source: IHS Global Trade Atlas
YTD through March

In terms of value, Brazil had the largest increase in YTD 2017 of any of Turkey's top 10 source countries, up 88 percent from YTD 2016. Other notable increases in import value included Russia (up 48%) and Spain (up 7%). Turkey's import value decreased from South Korea (down 31%), China (down 25%), Romania (down 18%), and Ukraine (down 7%).

Considerable declines in steel volume between YTD 2016 and YTD 2017 included Turkey's imports from China (down 60%), Romania (down 44%), South Korea (down 39%), and Ukraine (down 38%). Only Turkey's imports from Brazil increased in volume, up 23 percent from YTD 2016.

Steel Imports Report: Turkey

Top Sources by Steel Product Category

The top source countries for Turkey’s imports by volume vary across types of steel products. Russia accounted for the largest share of Turkey’s imports of flat products in YTD 2017 at 39 percent (745 thousand metric tons).

Spain accounted for the largest share of Turkey’s imports of long products at 23 percent (82 thousand metric tons). China was the largest source of Turkey’s imports of pipe and tube products at 52 percent (59 thousand metric tons) and stainless products at 28 percent (41 thousand metric tons). Ukraine accounted for the largest share of imports of semi-finished products at 40 percent (250 thousand metric tons).

The U.S. was not a top 5 source country for any product category in YTD 2017.

Steel Imports Report: Turkey

Turkey's Export Market Share from Top Source Countries

In 2016, the share of steel exports sent to Turkey from its top import sources decreased in six of Turkey's top 10 import source countries. The share of Ukraine's steel exports to Turkey showed the largest decrease (down 2.1 percentage points), followed by Romania (down 2 percentage points) and France (down 1.3 percentage points). Export shares to Turkey in Russia, China, and Italy each decreased by less than one percentage point. Brazil had the largest increase in its share of exports to Turkey in 2016, up 1.9 percentage points.

Turkey's Steel Export Market Share				
Top 10 Import Sources	Share of Exports to Turkey - 2015	Turkey's Rank in 2015	Share of Exports to Turkey - 2016	Turkey's Rank in 2016
Russia	19.6%	1	18.8%	1
China	2.8%	9	2.0%	14
Ukraine	14.2%	2	12.1%	2
South Korea	3.4%	9	3.7%	9
Romania	26.5%	1	24.6%	1
France	5.9%	5	4.7%	5
Spain	6.1%	7	6.5%	6
Italy	4.0%	6	3.5%	8
Germany	2.1%	13	2.1%	14
Brazil	7.5%	2	9.3%	2

Source: IHS Global Trade Atlas, based on export data per reporting country

Among Turkey's top sources, Russia, Ukraine, and Romania sent the largest shares of their total steel exports to Turkey in 2016. Semi-finished products accounted for the largest share of steel exports to Turkey in Russia and Ukraine at 51 percent (3 million metric tons) and 72 percent (1.6 million metric tons), respectively. Flat products ranked first in Romania's exports to Turkey at 85 percent (513 thousand metric tons), and second in both Russia's and Ukraine's exports to Turkey at 48 percent (2.8 million metric tons) and 25 percent (542 thousand metric tons), respectively.

Steel Imports Report: Turkey

Overall Production and Import Penetration

Sources: World Steel Association; IHS Global Trade Atlas
YTD through March

Turkey's crude steel production increased 14 percent to 8.8 million metric tons in YTD 2017, from YTD 2016's total of 7.7 million metric tons. The gap between production and apparent consumption (a measure of steel demand), which stood at 7.1 million metric tons or 28 percent of production in 2009, shrank steadily over the next six years. By 2015, Turkey's demand outpaced the country's production by over 800 thousand metric tons and by over 300 thousand metric tons in 2016. Between YTD 2016 and YTD 2017, demand decreased by 10 percent, and production once again outpaced demand by over 1.5 million metric tons. Turkey's steel import penetration level decreased to 43.7 percent in YTD 2017, down from 53.2 percent in YTD 2016.

Top Producers

Though steel production in Turkey began with the emergence of state-owned companies in the 1930s, steel works were all privatized by 2002. The majority of Turkey's crude steel production uses electric arc furnace technology, and long products make up the majority of Turkey's finished steel production.

Turkey's Top Steel Producers in 2016			
Rank	Company	Production (mmt)	Main Products
1	Erdemir Group	8.6	Flat products, wire rod, pipe
2	İçdaş	3.7 (2014)	Billets, reinforcing bars, wire rod
3	Habaş	2.5 (capacity)	Carbon, stainless, hot-rolled
4	İsdemir (owned by Erdemir)	N/A	Hot-rolled flat, billets, reinforcing bars, profiles, structural steel
5	Çolakoğlu Metalurji	N/A	Billets, slabs, hot-rolled coil, hot-rolled sheet, reinforcing bars
6	Kardemir	N/A	Billets, profiles, reinforcing bars

Trade Remedies in the Steel Sector

Antidumping duties (AD), countervailing duties (CVD), associated suspension agreements, and safeguards are often referred to collectively as trade remedies. These are internationally agreed upon mechanisms to address the market-distorting effects of unfair trade, or serious injury or threat of serious injury caused by a surge in imports. Unlike anti-dumping and countervailing measures, safeguards do not require a finding of an “unfair” practice. Before applying these duties or measures, countries investigate allegations and can remedy or provide relief for the injury caused to a domestic industry. The table below provides statistics on the current number of trade remedies Turkey has against imports of steel mill products from various countries. Turkey has no steel mill safeguards in effect.

Turkey’s Trade Remedies in Effect Against Steel Mill Imports				
Country	AD	CVD	Suspension Agreements and Undertakings	Total
China	3			3
Malaysia	1			1
Taiwan	1			1
Vietnam	1			1
TOTAL	6	0	0	6

Steel Imports Report: Glossary

Apparent Consumption: Domestic crude steel production plus steel imports minus steel exports. Shipment data are not available for all countries, therefore crude steel production is used as a proxy.

Export Market: Destination of a country's exports.

Flat Products: Produced by rolling semi-finished steel through varying sets of rolls. Includes sheets, strips, and plates. Used most often in the automotive, tubing, appliance, and machinery manufacturing sectors.

Import Penetration: Ratio of imports to apparent consumption.

Import Source: Source of a country's imports.

Long Products: Steel products that fall outside the flat products category. Includes bars, rails, rods, and beams. Used in many sectors but most commonly in construction.

Pipe and Tube Products: Either seamless or welded pipe and tube products. Used in many sectors but most commonly in construction and energy sectors.

Semi-finished Products: The initial, intermediate solid forms of molten steel, to be re-heated and further forged, rolled, shaped, or otherwise worked into finished steel products. Includes blooms, billets, slabs, ingots, and steel for castings.

Stainless Products: Steel products containing at minimum 10.5% chromium (Cr) offering better corrosion resistance than regular steel.

Steel Mill Products: Carbon, alloy, or stainless steel produced by either a basic oxygen furnace or an electric arc furnace. Includes semi-finished steel products and finished steel products. For trade data purposes, steel mill products are defined at the Harmonized System (HS) 6-digit level as: 720610 through 721650, 721699 through 730110, 730210, 730240 through 730290, and 730410 through 730690. The following discontinued HS codes have been included for purposes of reporting historical data (prior to 2007): 722520, 722693, 722694, 722910, 730410, 730421, 730610, 730620, and 730660.

Global Steel Trade Monitor: The monitor provides global import and export trends for the top countries trading in steel products. The current reports expand upon the early release information already provided by the Steel Import Monitoring and Analysis (SIMA) system that collects and publishes data on U.S. imports of steel mill products. Complementing the SIMA data, these reports provide objective and current global steel industry information about the top countries that play an essential role in the global steel trade. Information in these reports includes global exports and import trends, production and consumption data and, where available, information regarding trade remedy actions taken on steel products. The reports will be updated quarterly.

Steel Import Monitoring and Analysis (SIMA) System: The Department of Commerce uses a steel import licensing program to collect and publish aggregate data on near real-time steel mill imports into the United States. SIMA incorporates information collected from steel license applications with publicly released data from the U.S. Census Bureau. By design, this information provides stakeholders with valuable information on the steel trade with the United States. For more information about SIMA, please go to <http://enforcement.trade.gov/steel/license/>.
